TECHNICAL SKILLS

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX ,APIs

Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebars, Sequelize

PROJECTS

1.

Rock and Roam application

github repo | github: <https://glynismullankwok.github.io/musiclocations/>

Rock and Roam is an interactive website where users can enter the name of a city/state/country and get results of songs about the place. The results include lines to the lyrics, a map to the place, and a photo of the city.

Rock and Roam is a front end app that allows the users to search lyrics by city /state.

My role in the project:collaborated with a group.

Technology used:html, styling css and ajax.

2.

weather application

github repo : | github: <https://negasimichael.github.io/-Weather-Dashboard/>

Weather dashboard is a full stack app that allows users to search five days' weather forecast any city entered. Users can search different cities.

Technology used: handlebars, CSS, HTML, javascript, jQuery.

3.

Code-Quiz application

Github repo: | [github: https://negasimichael.github.io/Code-Quiz/](https://negasimichael.github.io/Code-Quiz/)

Quiz Code app is a javascript based application developed for taking timed quizzes with multiple-choice questions. Users can escape or save grade scores, and clear and retake the quiz.

Technology used: HTML, CSS and ES6 javascript .

4.

Burger-logger app

Github repo: <https://github.com/negasimichael/burger-logger/>

Burger-logger app

Technology used: MySQL, Node, Express, Handlebars
